

Use case - Buyer removes saved card

Use case

Step	Description	System
1	User chooses to remove a saved card	Web shop
2	User should receive a confirmation / error message	Web shop

Implementation

To implement this use case the shop should request saved payment methods (check "List payment methods" use case) and a non empty list of payment methods should be presented to the user.

Based on the id of the payment method to be removed a further server interface call should be made.

Parameters of interest

Server Interface / Remove Saved Payment Method (remove-saved-payment-method)

Parameter	Usage
I-t-1-20_saved-payment-method-id	numeric id of the payment method queried earlier
